

Great News!

The Mercy Care Preferred Drug Lists (PDL)—or formularies—for Mercy Care Plan, Mercy Care Advantage and Mercy Healthcare Group have been added to the Epocrates Web site. Accessing the Mercy Care PDL before you prescribe will help you find covered medications while the member is in your office. Identifying covered medications at the time of the visit will prevent pharmacy call backs to your office to obtain a prescription for a covered medication.

Visit www.Epocrates.com and tap “Yes” to have the Mercy Care PDLs added to your PDA device. Then sync your device to send your request to www.Epocrates.com. Wait 24 hours and sync again. The PDLs will be automatically installed on your handheld. The download is at no cost to you.
